1 Introduction and Review of Literature	1
1.1 Introduction	1
1.2 Basic Concepts	4
1.3 Review of Literature	19
1.4 Motivation of the present work	28
1.5 Objectives of the Study	29
1.6 Outline of the Present Study	30
2 A New Generalization to the DUS Transformation and its Applications	33
2.1 Introduction	33
2.2 PGDUS Exponential Distribution	35
2.3 PGDUS Weibull Distribution	44
2.4 PGDUS Lomax Distribution	56
2.5 Summary	64
3 Exponential-Gamma $(\mathbf{3}, \theta)$ Distribution: A Bathtub Shaped Failure Rate Model	69
3.1 Introduction	69
3.2 Exponential-Gamma $(\mathbf{3}, \theta)$ Distribution	70

3.3	Statistical Properties of $EGD(\mathbf{3}, \theta)$	73
3.4	Parametric Estimation	78
3.5	Simulation Study	79
3.6	Applications	79
3.7	Summary	81
4	Generalized ν-Birnbaum Saunders Distribution	83
4.1	Introduction	83
4.2	Univariate ν -Birnbaum Saunders Distribution	85
4.3	Bivariate ν - Birnbaum Saunders Distribution	100
4.4	Multivariate ν - Birnbaum Saunders Distribution	102
4.5	Summary	103
5	Inference for $R = P[X > Y]$ based on the Exponential-Gamma ($\mathbf{3}, \lambda$) Distribution	105
5.1	Introducion	105
5.2	Stress-Strength Reliability of $EGD(3, \lambda)$ Distribution	107
5.3	Maximum Likelihood Estimator of R	108
5.4	Simulation Study	111
5.5	Applications	115
5.6	Summary	116
6	A Simple Step-Stress Analysis of Type II Gumbel Distribution	117
6.1	Introduction	117
6.2	Model Description	120
6.3	Maximum Likelihood Estimation	121
6.4	Interval Estimation	123
6.5	Summary	124
7	Conclusion and Future Directions	125
7.1	Conclusion	125
7.2	Future Directions	128

List of Figures

1.1	Exponential hazard function plot	7
1.2	Gamma hazard function plot	8
1.3	Weibull hazard function plot	9
1.4	Lomax hazard function plot	10
1.5	Birnbaum Saunders hazard function plot	12
1.6	Type-II Gumbel hazard function plot	14
2.1	Density plot for PGDUSE	36
2.2	Failure rate plot for PGDUSE	37
2.3	The empirical CDFs of the models.	44
2.4	Density plot for PGDUSW	45
2.5	Failure rate plot for PGDUSW	46
2.6	ECDF plot for various distributions.	55
2.7	Fitted Density plot for various distributions.	56
2.8	PGDUSL distribution density plot for various parameter values.	57
2.9	PGDUSL distribution HRF plot for various parameter values.	58
2.10	ECDF plot of the models for blood cancer patients dataset.	66
2.11	Estimated densities of the models for the blood cancer patients dataset.	66
3.1	PDF plot for $\theta \leq 1$	72
3.2	PDF plot for $\theta > 1$	72
3.3	HRF plot of $EGD(\theta)$ for $\theta = 4.95, 5, 5.15$	73
3.4	P-P Plots	82
4.1	Probability density function plots	87
4.2	Failure rate function plots for different parameter values.	88

4.3	Contour plot of β and ν in (a) industrial devices data, (b) exceedances of flood peaks data and (c) insurance data using ν - Birnbaum Saunders distribution	101
-----	---	-----

List of Tables

2.1	Estimate, Biases and MSEs for PGDUSE model at $\lambda = 0.5$ and $\theta = 0.5$	41
2.2	Estimate, Biases and MSEs for PGDUSE model at $\lambda = 0.5$ and $\theta = 1.5$	42
2.3	Estimate, Biases and MSEs for PGDUSE model at $\lambda = 1$ and $\theta = 1.5$	42
2.4	Estimate, Biases and MSEs for PGDUSE model at $\lambda = 1.5$ and $\theta = 2.5$	43
2.5	Ball bearings dataset	43
2.6	MLEs of the parameters, Log-likelihoods, AIC, BIC, KS Statistics and p-values of the fitted models	43
2.7	Estimate, Biases and MSEs for PGDUSW model at $\alpha = 0.5, \beta = 0.5$ and $\theta = 0.5$	52
2.8	Estimate, Biases and MSEs for PGDUSW model at $\alpha = 0.5, \beta = 1$ and $\theta = 0.5$	53
2.9	Estimate, Biases and MSEs for PGDUSW model at $\alpha = 1, \beta = 1$ and $\theta = 0.5$	54
2.10	Findings for PGDUSW Distribution	55
2.11	Estimate, Biases and MSEs for PGDUSL model at $\alpha = 0.5, \beta = 0.5$ and $\theta = 0.5$	62
2.12	Estimate, Biases and MSEs for PGDUSL model at $\alpha = 1, \beta = 1.5$ and $\theta = 0.5$	63
2.13	Estimate, Biases and MSEs for PGDUSL model at $\alpha = 1, \beta = 1.5$ and $\theta = 1$	64
2.14	Blood Cancer Patients Dataset	65
2.15	Findings for PGDUSL distribution	65
3.1	Simulation study for $\theta = 1, 1.5, 1.85$	80
3.2	The survival data on the death times of Psychiatric inpatients . . .	80
3.3	The estimates, K-S test statistic and log-likelihood for the dataset .	81
3.4	AIC, BIC, and CAIC of the models based on the dataset	81

4.1	MLEs, MSEs, Biases, CPs and ALs for ν - BS model with $\alpha = 2, \beta = 1$ and $\nu = 1.5$	95
4.2	Industrial devices data	96
4.3	Descriptive statistics: Industrial devices data	97
4.4	MLEs (standard errors in parentheses), K-S distance, p-values, MLL values, and AIC values: industrial devices Aarset data set	97
4.5	Exceedances of flood peaks data	98
4.6	Descriptive statistics: exceedances of flood peaks data	98
4.7	MLEs (standard errors in parentheses), K-S distance, p-values, MLL values, and AIC values: exceedances of flood peaks data set	99
4.8	Insurance data	99
4.9	Descriptive statistics: Insurance data	99
4.10	MLEs (standard errors in parentheses), K-S distance, p-values, MLL values, and AIC values: insurance data set	100
5.1	MLE, average(Avg) bias, and MSEs of different estimators of R when $\lambda_1 = 0.5$ and $\lambda_2 = 1.5$	112
5.2	MLE, Avg bias, and MSEs of different estimators of R when $\lambda_1 = 1$ and $\lambda_2 = 1.5$	113
5.3	MLE, Avg bias, and MSEs of different estimators of R when $\lambda_1 = 1.5$ and $\lambda_2 = 0.5$	114
5.4	MLE, CVM, and KS goodness of fit tests for X data	115
5.5	MLE, CVM, and KS goodness of fit tests for Y data	116
