

TABLE OF CONTENT

CHAPTER NUMBER	CONTENT	PAGE NUMBER
	<i>Acknowledgement</i>	i-ii
	<i>Table of content</i>	iii-vi
	<i>List of figures</i>	vii-xiv
	<i>List of tables</i>	xv-xvii
1	Introduction	1-10
2	The synthetic utility of β-oxodithioesters- a review	11-31
	<i>References</i>	32-34
3	Synthesis of chromene-2-thiones from β-xodithioesters	
3.1	Introduction	35
3.2	Review of literature	36-45
3.3	Results and discussion	46
3.3.1	<i>Synthesis of β-oxodithioesters</i>	46-48
3.3.2	<i>Synthesis of chromene-2-thiones</i>	49-52
3.4	Characterisation	53-55
3.5	Biological studies- <i>In vitro</i> cytotoxicity	56-58
3.6	Molecular docking studies on anticancer activity	59-63
3.7	Experimental details	64
3.7.1	<i>Materials and methods</i>	64
3.7.2	<i>Synthesis of β-oxodithioester</i>	64
37.3	<i>Synthesis of chromene-2-thiones</i>	65-69
3.8	Conclusion	70

	<i>References</i>	71-74
4	Synthesis of 1,2-dithiole-3-thiones from β-oxodithioesers	
4.1	Introduction	75
4.2	Strategies for 1,2-dithiole-3-thione synthesis	76-84
4.3	Results and discussion	85-87
4.4	Characterisation	88-89
4.5	Biological studies - <i>In vitro</i> cytotoxicity	90-91
4.6	Molecular docking studies on anticancer activity	92-95
4.7	Experimental details	96
4.7.1	<i>Materials and methods</i>	96
4.7.2	<i>Synthesis of β-oxodithioester</i>	96
4.7.3	<i>Synthesis of 1,2-dithiole-3-thiones</i>	96-98
4.8	Conclusion	99
	<i>References</i>	100-102
5	Synthesis of dihydropyridine-2-thione and 3,4-diphenyl thiophene from β-oxodithioesers	
5.1	Introduction	103
5.2	Synthesis of pyridines: a review	104-114
5.3	Results and discussion	115
	<i>Synthesis and characterisation of dihydropyridine-2-thione</i>	115-121
5.4	Synthetic strategies for 3,4-diphenyl thiophene	122-124
5.5	Results and discussion	125
	<i>Synthesis and characterisation of 3,4-diphenyl thiophene</i>	125-127
5.6	<i>In vitro</i> antibacterial studies	128-132

5.7	<i>In silico</i> molecular docking studies	133
5.7.1	<i>Molecular docking studies on anticancer activity</i>	133-140
5.7.2	<i>Molecular docking studies on antibacterial activity</i>	141-148
5.8	Experimental details	149
5.8.1	<i>Materials and methods</i>	149
5.8.2	<i>Synthesis of dihydropyridine-2-thione</i>	149-150
5.8.3	<i>Synthesis of 3,4-diphenyl thiophene</i>	151
5.9	Conclusion	152-153
	<i>References</i>	154-157
6	Development of molecular fluorophore for sensing thorium ion	
6.1	Introduction	159-160
6.2	Synthesis of fluorescent compounds	161-171
6.3	Results and discussion	172
6.3.1	<i>Synthesis and characterisation of triazoles</i>	174-177
6.3.2	<i>Synthesis and characterisation of triazole functionalized coumarin</i>	178-179
6.3.3	<i>Synthesis and characterisation of triazole functionalized fluorene</i>	180-183
6.3.4	<i>Synthesis and characterisation of thioamide functionalized fluorene</i>	184-186
6.4	Fluorescence studies and development of thorium sensor	187-191
6.4.1	<i>UV-Visible spectral studies</i>	192-194
6.4.2	<i>Spectrofluorometric studies</i>	195-197
6.4.3	<i>Theoretical calculations</i>	198-201
6.5	In vitro antibacterial studies	201

6.5.1	<i>In vitro</i> antibacterial studies on triazoles	202-204
6.5.2	<i>In vitro</i> antibacterial studies on fluorene derivatives	205-206
6.6	Molecular docking studies on antibacterial activity	207
6.6.1	<i>Docking studies on triazoles</i>	207-211
6.6.2	<i>Docking studies on triazole functionalized fluorene</i>	212-215
6.6.3	<i>Docking studies on thioamide functionalized fluorene</i>	216-219
6.7	Experimental details	220
6.7.1	<i>Materials and methods</i>	220
6.7.2	<i>Synthesis of triazoles</i>	220-221
6.7.3	<i>Synthesis of triazole functionalized coumarin</i>	222-223
6.7.4	<i>Synthesis of triazole functionalized fluorene</i>	224
6.7.5	<i>Synthesis of thioamide functionalized fluorene</i>	225
6.8	Conclusion	225-226
	<i>References</i>	227-230
7	Summary and conclusion	231-234
8	Publications	235-236

LIST OF FIGURES

Figure No.	Title	Page No
Chapter 1		
1	Structure of some heterocyclic compounds	2
2	Structure of benzimidazole derivatives	3
3	Structure of thiocoumarins	4
4	Structure of 1,2-dithiole-3-thiones	4
5	Structure of pyridine-2-thione	5
6	Structure of thiophenes	5
7	Structure of triazoles	6
8	Structure of metal ion detectors	6
Chapter 2		
1	Reactive sites of β -oxodithioesters	11
Chapter 3		
1	Structure of coumarins	35
2	Lawesson's reagent	42
3	Thiocoumarin based photocages	46
4	Phosphate caging group	46
5	3-Benzoyl-2H-chromene-2-thione	53
6	^1H NMR spectrum of 3-benzoyl-2H-chromene-2-thione	54
7	^{13}C NMR spectrum of 3-benzoyl-2H-chromene-2-thione	55
8	Single crystal XRD of 3-benzoyl-2H-chromene-2-thione	55

9a	Structure of human DNA topoisomerase II alpha	60
9b	Structure of human DNA topoisomerase II beta	60
10a	Bound conformation of human DNA topoisomerase II alpha and 3-benzoyl-2H-chromene-2-thione	62
10b	Bound conformation of human DNA topoisomerase II beta and 3-benzoyl-2H-chromene-2-thione	62
11a	Interaction between human DNA topoisomerase II alpha and 3-benzoyl-2H-chromene-2-thione	63
11b	Interaction between human DNA topoisomerase II beta and 3-benzoyl-2H-chromene-2-thione	63
Chapter 4		
1	1,2-dithiole-3-thione derivatives	75
2	5-phenyl-3H-1,2-dithiole-3-thione	88
3	FT-IR spectrum of 5-phenyl-3H-1,2-dithiole-3-thione	88
4	¹ H NMR spectrum of 5-phenyl-3H-1,2-dithiole-3-thione	89
5	¹³ C NMR spectrum of 5-phenyl-3H-1,2-dithiole-3-thione	90
6a	Bound conformation of human DNA topoisomerase II alpha and 5-phenyl-3H-1,2-dithiole-3-thione	94
6b	Bound conformation of human DNA topoisomerase II beta and 5-phenyl-3H-1,2-dithiole-3-thione	94

7a	Interaction between human DNA topoisomerase II alpha and 5-phenyl-3H-1,2-dithiole-3-thione	95
7b	Interaction between human DNA topoisomerase II beta and 5-phenyl-3H-1,2-dithiole-3-thione	95
Chapter 5		
1	Structures of pyridine-2-thione	111
2	Bonding modes of pyridine-2-thiones	112
3	Structure of N-benzoyloxy-2-thiopyridone	113
4	Structure of dihydropyridine-2-thione	118
5	FT-IR spectrum of dihydropyridine-2-thione	119
6	¹ H NMR spectrum of dihydropyridine-2-thione	119
7	¹³ C NMR spectrum of dihydropyridine-2-thione	120
8	Single crystal XRD of dihydropyridine-2-thione	121
9	Structure of 3,4-diphenyl thiophene	127
10	¹ H NMR spectrum of 3,4-diphenyl thiophene	127
11	¹³ C NMR spectrum of 3,4-diphenyl thiophene	128
12a	Antibacterial activity of dihydropyridine-2-thione against <i>Bascillus subtilis</i>	131
12b	Antibacterial activity of dihydropyridine-2-thione against <i>Staphylococcus aureas</i>	131
12c	Antibacterial activity of dihydropyridine-2-thione against <i>Escherichia coli</i>	131
12d	Antibacterial activity of dihydropyridine-2-thione against <i>Pseudomonas aeruginosa</i>	131
13a	Bound conformation of human DNA topoisomerase II alpha and dihydropyridine-2-thione	135

13b	Bound conformation of human DNA topoisomerase II beta and dihydropyridine-2-thione	135
14a	Interaction between human DNA topoisomerase II alpha and dihydropyridine-2-thione	136
14b	Interaction between human DNA topoisomerase II beta and dihydropyridine-2-thione	136
15a	Bound conformation of human DNA topoisomerase II alpha and 3,4-diphenyl thiophene	139
15b	Bound conformation of human DNA topoisomerase II beta and 3,4-diphenyl thiophene	139
16a	Interaction between human DNA topoisomerase II alpha and 3,4-diphenyl thiophene	140
16b	Interaction between human DNA topoisomerase II beta and 3,4-diphenyl thiophene	140
17a	Structure of <i>Bacillus subtilis</i> FtsZ	141
17b	Structure of <i>Bacillus subtilis</i> DNA gyrase	141
18a	Bound conformation of <i>Bacillus subtilis</i> FtsZ and dihydropyridine-2-thione	144
18b	Bound conformation of <i>Bacillus subtilis</i> DNA gyrase and dihydropyridine-2-thione	144
19a	Interaction between <i>Bacillus subtilis</i> FtsZ and dihydropyridine-2-thione	145
19b	Interaction between <i>Bacillus subtilis</i> DNA gyrase and dihydropyridine-2-thione	145
20a	Bound conformation of <i>Bacillus subtilis</i> FtsZ and 3,4-diphenyl thiophene	147

20b	Bound conformation of <i>Bacillus subtilis</i> DNA gyrase and 3,4-diphenyl thiophene	147
21a	Interaction between <i>Bacillus subtilis</i> FtsZ and 3,4-diphenyl thiophene	148
21b	Interaction between <i>Bacillus subtilis</i> DNA gyrase and 3,4-diphenyl thiophene	148
Chapter 6		
1	Structure of fluorene	160
2	Phosphonic acid functionalized fluorene derivatives	163
3	Fluorene derived metal ion sensing probe	164
4	SPIONs functionalized fluorescent fluorene chemosensors	165
5	Fluorene analogues	169
6	Pyridine based chemosensor	170
7	Thorium sensor	171
8	Triazole based chemosensor	173
9	Structure of 1,2,3-triazole	177
10	FT-IR spectrum of 1,2,3-triazole	177
11	¹ H NMR spectra of 1,2,3-triazole	178
12	¹³ C NMR spectrum of 1,2,3-triazole	178
13	Structure of triazole functionalized fluorene	181
14	FT-IR spectrum of triazole functionalized fluorene	182
15	¹ H NMR spectrum of triazole functionalized fluorene	182

16	¹³ C NMR spectrum of triazole functionalized fluorene	183
17	GCMSMS spectrum of triazole functionalized fluorene	183
18	Structure of thioamide functionalized fluorene	184
19	FT-IR spectrum of thioamide functionalized fluorene	185
20	¹ H NMR spectrum of thioamide functionalized fluorene	185
21	¹³ C NMR spectrum of thioamide functionalized fluorene	186
22	GCMSMS spectrum of thioamide functionalized fluorene	186
23	Fluorescence of triazole functionalized compounds	188
24	Fluorescence of thioamide functionalized fluorene	191
25	Fluorescence of triazole functionalized fluorene	191
26	Fluorescence of thorium complex of triazole functionalized fluorene at different concentrations	192
27	UV-Visible spectrum of triazoles and their complexes	194
28	UV-Visible spectrum of triazole functionalized coumarin, fluorene derivatives, and their complexes	194

29	UV-Visible spectrum of thorium complex of triazole functionalized fluorene at different concentrations	195
30	Fluorescence spectrum of triazole functionalized fluorene and its complex	196
31	Fluorescence spectrum of thorium complex of triazole functionalized fluorene at different concentrations of thorium	196
32	Fluorescence spectrum of triazole functionalized fluorene and its complex	197
33	Fluorescence spectrum of thorium complex of triazole functionalized fluorene at different concentrations of thorium and compound	198
34	Optimised geometry of triazole functionalized fluorene	198
35	Selected molecular orbitals of triazole functionalized fluorene	199
36	Important electronic calculations of triazole functionalized fluorene	201
37	<i>In vitro</i> antibacterial activity of triazoles	203
38	<i>In vitro</i> antibacterial activity of fluorene derivatives	205
39a	Structure of <i>Staphylococcus aureus</i> FtsZ	208
39b	Structure of <i>Staphylococcus aureus</i> DNA gyrase	208
40a	Bound conformation of <i>Staphylococcus aureus</i> FtsZ and triazole	210
40b	Bound conformation of <i>Staphylococcus aureus</i> DNA gyrase and triazole	210

41a	Interaction between <i>Staphylococcus aureus</i> FtsZ and triazole	211
41b	Interaction between <i>Staphylococcus aureus</i> DNA gyrase and triazole	211
42a	Structure of <i>Escherichia coli</i> FtsZ	212
42b	Structure of <i>Escherichia coli</i> DNA gyrase	212
43a	Bound conformation of <i>Escherichia coli</i> FtsZ and triazole functionalized fluorene	214
43b	Bound conformation of <i>Escherichia coli</i> DNA gyrase and triazole functionalized fluorene	214
44a	Interaction between <i>Escherichia coli</i> FtsZ and triazole functionalized fluorene	215
44b	Interaction between <i>Escherichia coli</i> DNA gyrase and triazole functionalized fluorene	215
45a	Structure of <i>Pseudomonas aeruginosa</i> FtsZ	216
45b	Structure of <i>Pseudomonas aeruginosa</i> DNA gyrase	216
46a	Bound conformation of <i>Pseudomonas aeruginosa</i> FtsZ and thioamide functionalized fluorene	218
46b	Bound conformation of <i>Pseudomonas aeruginosa</i> DNA gyrase and thioamide functionalized fluorene	218
47a	Interaction between <i>Pseudomonas aeruginosa</i> FtsZ and thioamide functionalized fluorene	219
47b	Interaction between <i>Pseudomonas aeruginosa</i> DNA gyrase and thioamide functionalized fluorene	219

LIST OF TABLES

Table Number	Title	Page Number
Chapter 3		
1	Synthesis of β -oxodithioesters from different ketones	48
2	Synthesis of chromene-2-thiones from different β -oxodithioesters and aldehyde	51-53
3	Crystal data and measurement details for 3-benzoyl-2H-chromene-2-thione	56
4	Cytotoxic activity of chromene-2-thiones against DLA and EAC cell lines	58
5	Cytotoxic activity of chromene-2-thiones against normal cell lines	59
6	Binding energies and possible interactions of 3-benzoyl-2H-chromene-2-thione with human DNA topoisomerase II alpha and II beta	61
Chapter 4		
1	Synthesis of 1,2-dithiole-3-thiones from different β -oxodithioesters	87
2	Cytotoxic activity of 1,2-dithiole-3-thiones against DLA and EAC	91
3	Cytotoxic activity of 1,2-dithiole-3-thiones against normal cell lines	91

4	Binding energies and possible interactions of 1,2-dithiole-3-thione with human DNA topoisomerase II alpha and II beta	92
Chapter 5		
1	Crystallographic data of dihydropyridine-2-thione	121
2	Antibacterial activity of dihydropyridine-2-thione	131
3	Binding energies and possible interactions of dihydropyridine-2-thione with human DNA topoisomerase II alpha and II beta	134
4	Binding energies and possible interactions of 3,4-diphenyl thiophene with human DNA topoisomerase II a and II b	138
5	Binding energies and possible interactions of the dihydropyridine-2-thione with FtsZ and DNA gyrase	143
6	Binding energies and possible interactions of 3,4-diphenyl thiophene with FtsZ and DNA gyrase	146
Chapter 6		
1	Synthesis of 1,4-disubstituted 1,2,3-triazoles from different alkyl halides and alkynes	175
2	Optimisation of reactions conditions for the synthesis of 1,4-disubstituted 1,2,3-triazoles	176
3	Fluorescence emission studies in UV light	190

4	λ_{\max} for compound and complex with thorium (IV) ion	193
5	Electronic transitions of triazole functionalized fluorene	200
6	<i>In vitro</i> antibacterial activity of triazoles	202
7	<i>In vitro</i> antibacterial activity of fluorene derivatives	206
8	Binding energies and possible interactions of triazole with <i>Staphylococcus aureus</i> FtsZ and DNA gyrase	209
9	Binding energies and possible interactions of triazole functionalized fluorene with <i>Escherichia coli</i> FtsZ and DNA gyrase	213
10	Binding energies and possible interactions of thioamide functionalized fluorene with <i>Pseudomonas aeruginosa</i> FtsZ and DNA gyrase	217
