TITLE		PAGE NO.
CHAPTER 1		
Introduction and Literature Review		
1.1	Water pollution: causes, effects and solutions	1
1.2	Nanotechnology: a small answer to bigger questions	2
1.3	Nanotechnology in water treatment	3
1.3.1	Nanosorbents	4
1.3.2	Nanocatalysts and nanoparticles for reduction	6
1.3.3	Nanofiltration and Nanomembranes	8
1.3.4	Nano based disinfectants	9
1.4	Iron-based nanomaterials	9
1.5	Zero valent iron (Fe ⁰) nanoparticles and their properties	10
1.6	Synthesis of zero valent iron (Fe ⁰) nanoparticles	13
1.7	Modification on Fe ⁰ nanoparticles	18
1.7.1	Doping with catalytic metal	18
1.7.2	Surface modification/coating	19
1.7.3	Immobilisation onto supports	21
1.7.4	Emulsification	23
1.8	Applications of zero valent iron-based nanomaterials	23
1.8.1	Removal of heavy metals/metalloids:	24
1.8.2	Removal of nutrients	28
1.8.3	Degradation/removal of dyes	28
1.8.4	Degradation of chlorinated compounds	30
1.8.5	Degradation/removal of antibiotics	30
1.8.6	Antimicrobial activity	31
1.9	Objectives of the present study	32
1.10	References	32
CHAPTER 2		
Materials and Methods		
2.1	Materials used	47
2.2	Application of iron-based nanoparticles	48
2.2.1	Cr(VI) removal studies	48
2.2.2	Dye removal studies	49
2.3	Characterisation and analytical techniques used	50
CHAPTER 3		
Comparative study on the reactivity of zero valent iron nanoparticles (Fe⁰) and bimetallic iron-based nanoparticles for the removal of Cr(VI) and dyes from water		
3.1	Introduction	51
3.2	Experimental details	55
3.2.1	Synthesis of Fe ⁰ , Fe/Ni, Fe/Cu and Fe/Zn nanoparticles	55
3.2.2	Batch experiments	56

3.2.3	Characterisation and analytical techniques used	56
3.3	Results and discussion	58
3.3.1	Characterisation of Fe ⁰ , Fe/Ni, Fe/Cu and Fe/Zn nanoparticles	58
3.3.2	Cr(VI) removal studies	62
3.3.3	Dye removal studies	68
3.4	Conclusion	84
3.5	References	84
CHAPTER 4		
Synthesis of polymer-stabilised Fe⁰ and Fe/Ni bimetallic nanoparticles for the removal of Cr(VI) and triphenylmethane dyes from water		
4.1	Introduction	89
4.2	Experimental details	91
4.2.1	Synthesis of CS-Fe and CS-Fe/Ni nanoparticles	91
4.2.2	Batch experiments	91
4.2.3	Characterisation and analytical techniques used	92
4.3	Results and discussion	92
4.3.1	Characterisation of CS, CS-Fe and CS-Fe/Ni nanoparticles	92
4.3.2	Cr(VI) removal studies	95
4.3.3	Dye removal studies	98
4.4	Conclusion	109
4.5	References	109
CHAPTER 5		
TiO₂-zeolite composite modified Fe⁰ nanoparticles for the removal of Cr(VI) and malachite green dye from water		
5.1	Introduction	113
5.2	Experimental details	114
5.2.1	Preparation TiO ₂ -zeolite stabilized Fe nanoparticles	114
5.2.2	Batch experiments	115
5.2.3	Characterisation and analytical techniques used	116
5.3	Results and discussion	116
5.3.1	Characterisation of the prepared materials	116
5.3.2	Cr(VI) removal studies	124
5.3.3	MG dye removal studies	127
5.4	Conclusion	131
5.5	References	131
CHAPTER 6		
Green synthesis of iron nanoparticles using plant extracts of <i>Abrus precatorius</i> and <i>Strychnos nux-vomica</i> for the removal of Cr(VI) and malachite green dye from water		
6.1	Introduction	135
6.2	Experimental details	137
6.2.1	Preparation of plant extracts and phyto-genic Fe nanoparticles	137

6.2.2	Batch experiments	138
6.2.3	Characterisation and analytical techniques used	138
6.3	Results and discussion	139
6.3.1	Characterisation of AP and SN plant extracts	139
6.3.2	Characterisation of AP-Fe and SN-Fe nanoparticles	144
6.3.3	Cr(VI) removal studies	147
6.3.4	MG dye removal studies	151
6.4	Conclusion	156
6.5	References	156
CHAPTER 7		
Green synthesis of iron nanoparticles using ayurvedic composition <i>Triphala</i> and its constituents for the removal of Cr(VI) and malachite green dye from water		
7.1	Introduction	161
7.2	Experimental details	162
7.2.1	Preparation of plant extracts and phyto-genic Fe nanoparticles	162
7.2.2	Batch experiments	163
7.2.3	Characterisation and analytical techniques used	163
7.3	Results and discussion	164
7.3.1	Characterisation of TP plant extract	164
7.3.2	Characterisation of TC-Fe, TB-Fe, PE-Fe and TP-Fe nanoparticles	167
7.3.3	Cr(VI) removal studies	173
7.3.4	MG dye removal studies	176
7.4	Conclusion	179
7.5	References	179
CHAPTER 8		
Summary and Conclusion		
8.1	The practical significance of our work	185
8.2	Future scope of our investigation	186
List of Publications and Conference presentations
