

LIST OF FIGURES

Fig. No	Page No
1 <i>Pseudosida bidentata</i>	
a Relationship between total length (TL) , carapace height (CH) and instar number in female	80
b Relationship between TL, CH and age in male	80
c Egg production in relation to instar number	80
d Cumulative egg production related to adult instar number	80
e Survivorship curve of male and female	80
2 <i>Latonopsis australis</i>	
a Relationship between TL, CH and instar number in female	81
b Egg production in relation to instar number	81
c Cumulative egg production related to adult instar number	81
d Survivorship curve of female	81
3 <i>Diaphanosoma sarsi</i>	
a Relationship between TL , CH and instar number in female	82
b Egg production in relation to instar number	82
c Cumulative egg production related to adult instar number	82
d Survivorship curve of female	82
4 Growth increment in Sididae	83
5 Instar duration in Sididae	83
6 <i>Ceriodaphnia cornuta</i>	
a Relationship between TL, CH and instar number in female	109
b Egg production in relation to instar number	109
c Cumulative egg production related to adult instar number	109
d Survivorship curve of female	109
7 <i>Scapholeberis kingi</i>	
a Relationship between TL, CH and instar number in female	110
b Egg production in relation to instar number	110
c Cumulative egg production related to adult instar number	110
d Survivorship curve of female	110

Fig. No		Page No
8	<i>Simocephalus serrulatus</i>	
	a Relationship between TL, CH and instar number in female	111
	b Egg production in relation to instar number	111
	c Cumulative egg production related to adult instar number	111
	d Survivorship curve of female	111
9	Growth increment in Daphniidae	112
10	Instar duration in Daphniidae	112
11	<i>Moina brachiata</i>	
	a Relationship between TL, CH and instar number in female	128
	b Egg production in relation to instar number	128
	c Cumulative egg production related to adult instar number	128
	d Survivorship curve of female	128
12	<i>Moinodaphnia macleayi</i>	
	a Relationship between TL, CH and instar number in female	129
	b Relationship between TL, CH and age in male	129
	c Egg production in relation to instar number	129
	d Cumulative egg production related to adult instar number	129
	e Survivorship curve of male and female	129
13	Growth increment in Moinidae	130
14	Instar duration in Moinidae	130
15	<i>Ilyocryptus spinifer</i>	
	a Relationship between TL, CH and instar number in female	148
	b Egg production in relation to instar number	148
	c Cumulative egg production related to adult instar number	148
	d Survivorship curve	148
16	<i>Macrothrix triserialis</i>	
	a Relationship between TL, CH and instar number in female	149
	b Relationship between TL, CH and age in male	149
	c Egg production in relation to instar number	149
	d Cumulative egg production related to adult instar number	149
	e Survivorship curve of male and female	149
17	Population growth in <i>M. triserialis</i>	150

Fig. No	Page No
18 a Growth increment in Macrothricidae	150
b Instar duration in Macrothricidae	150
19 <i>Alona pulchella</i>	
a Relationship between TL, CH and instar number in female	163
b Egg production in relation to instar number	163
c Cumulative egg production related to adult instar number	163
d Survivorship curve of male and female	163
20 <i>Oxyurella singalensis</i>	
a Relationship between TL, CH and instar number in female	164
b Relationship between TL, CH and age in male	164
c Egg production in relation to instar number	164
d Cumulative egg production related to adult instar number	164
e Survivorship curve of male and female	164
21 Growth increment in Chydoridae	165
22 Instar duration in Chydoridae	165
